PROFESSIONAL SUMMARY

Experienced Mobile & Web Developer | AI-Assisted Development | POS & Inventory Systems | Quality Assurance Software Testing (Mobile, API, Web Development)

I am a results-driven Software Developer with 10 years of experience specializing in Android, Huawei, and iOS applications, as well as Unit/UI Testing, Postman API Testing, web development, inventory management, and POS technical support. Proficient in front-end and back-end development, API integration, and AI-assisted coding. Knowledgeable in documentation, ensuring clear, structured, and maintainable technical records. Known for strong problem-solving skills, attention to detail, and a collaborative team spirit. Passionate about building scalable, high-performance applications and leveraging tools to optimize workflows

EXPERIENCE

The Orange Company Inc. ,Philippines — Mobile Android /Huawei Developer

August 2022- PRESENT

- Developed multiple Android and Huawei mobile applications (In-House apps) with Jetpack Compose & XML. (TOP.PH, TOP KEY, QR generation)
- UNIT/ UI Testing using Espresso (Android Studio IDE)
- Integrated RESTful & SQL APIs for real-time and asynchronous data handling
- Implemented Huawei Mobile Services (HMS) such as Location Kit, Geocoder, and more
- Basic Mobile Support and Technical Office Support
- Internal / External support
- Wrote & maintained unit tests with JUnit, Mockito and Espresso to ensure code reliability
- Automated UI testing and Unit Testing for robust user experience validation
- Postman testing of api request, response and authentications.
- Optimized app performance by reducing memory leaks and improving response times
- Managed Play Store & AppGallery deployments, including signing, review compliance, and updates
- Collaborated with backend teams to improve API efficiency and resolve integration issues
- Enhanced CI/CD workflows in Azure DevOps for automated testing and release management

TECHNICAL SKILLS

- Huawei Development: HarmonyOS, HMS Core Integration
- IOS Development: Ui Testing (Manual)
- Python Language: SQLite creation of tables, QR code generator
- Visual Studio: QR code generator bundle using Visual Basic
- Frontend Development: Jetpack Compose, Native XML Layouts, UI/UX Optimization
- API Integration: Retrofit2, Alamofire (Swift), SQLite DAO, WebSockets,
- Testing: Unit Testing (JUnit, Mockito), UI Testing (Espresso)
- Store Deployment: Google Play Store, Huawei AppGallery, CI/CD Pipelines (Azure DevOps)
- Android Development: Jetpack Compose, Kotlin, Java
- Amazon Web Services

LANGUAGES

- Java – Kotlin - Jetpack Compose
- ArkTypeScript (Huawei - OpenHarmony)
- Visual Basic, C++, C#, .Net
- HTML - CSS
- MEAN Stack – MongoDB, Express JS
- Angular, Node JS
- Python
- Basic PHP Script Programming

SERVICIO International, DOHA Qatar — Software Information Technology

April 2020 - September 2021

- Developed/Maintaining SERVICIO application Android and IOS version
- Q.A Tester for the Android version
- Website development and maintenance of SERVICIO
- Installation of software and applications
- Maintaining AWS Cloud Server for SERVICIO
- Maintaining MongoDB Database
- Maintaining and supporting office equipments and other technical support

MyTianggePH, Philippines — Head Android Developer – Front End/ Back End

June 2020- March 2021

- Developed MyTianggePH android version
- Q.A Tester for the Website development team of MyTianggePH
- Q.A Tester for the Android version
- API Back-End Tester using CURL and Postman for the integration between the android app and the website
- API Back-End Developer for android

Everfit Holding Company Inc.,Philippines — Lead Systems Developer /Information Technology Assistant

May 2017- March 2020

- Support for In-house POS system for Philippines ,Mall Networks and coordination with Contractors
- Training Instructor for POS In-house application
- Team Lead for Management Inventory
- System and VIP card system
- Warehouse network cabling and support
- Head Office internal support
- Setup newly purchased POS hardware for newly opened stores
- Format and Backup Data (SOP) of Servers and computers
- Installation of software's and applications (Ex.
- Adobe Master Collection) and other In-house programs
- Registering users in active directory for utilization of domain network via VPN connection
- Creation of new database using data CFG (Context Free Grammar)
- Reports gathering and monitoring using backend SQL queries (MS Sql Server 2000 ~ 2008 R2)
- Maintaining Confidentiality of Sales and checking of inventory for discrepancies
- Support for Store Giordano PH, NEW ERA Caps PH, NBA Philippines, Popsicle Magazine PH, Versus Barcade Uptown Makati city

Asian Business Solutions Inc.,Makati City PH— System Analyst Data Programmer Engineer Trainee

May 2015 - April 2016

- Spring MVC JavaScript/Dojo Toolkit developer
- User Interface / Web Design
- Key Accomplishments Insurance Brokerage System

SOFTWARE PLATFORM

- Android Studio - Huawei DevEco-Studio
- Visual Studio 2010 – Visual Studio Code
- Netbeans IDE
- POSTMAN (API Testing)
- Espresso UI/Unit Testing
- Spring tool Suite (MVC)
- Microsoft Azure Dev
- DevOps Azure
- Trello
- Amazon Web Services
- Sql Server 2000 ~ 2014
- MySQL Database
- SQLite DAO
- Adobe Photoshop, Adobe Flash, Adobe Illustrator, Adobe InDesign, Adobe 3D after effects
- Oracle Database: Forms and Reports
- MSOffice 365/ MSOffice 2010

WEB DEVELOPER TOOLS

- WordPress, PHP, HTML5, MySQL
- REST API
- MEAN Stack – MongoDB, Express JS,
- Angular, Node JS
- MS Command Prompt Script (.BAT FILES), Mac Terminal Bash Scripts

AI-Assisted Development

Leveraging ChatGPT, DeepSeek, and other AI tools for code generation, debugging, and documentation

AI Development

Learning and developing AI Large Language Model with RAG. Enhancing its NLP and its trained model set.

SEMINARS

AWS Summit Singapore May 2024

Overview: Attended the 10th edition of the AWS Summit in Singapore, focusing on advancements in cloud computing, AI integration, and digital transformation strategies.

Key Highlights:

- AWS Investment Announcement: AWS declared an additional $12 billion investment in Singapore by 2028, aiming to bolster cloud infrastructure and services in the region.
- Launch of AWS AI Spring: Introduction of a flagship AI program designed to accelerate AI adoption across various sectors in Singapore, with a goal to train 5,000 individuals annually in AI skills from 2024 to 2026
- Keynote Insights: Discussions on leadership in the era of AI, strategies for leveraging generative AI to drive economic growth, and the importance of upskilling the workforce to adapt to technological advancements.

AWS Innovate (Generative Ai + DATA) March 06, 2025

Attended AWS Innovate, a virtual event focused on generative AI and data-driven solutions. Covered key topics such as building and scaling AI applications, integrating generative AI into workplaces, training large language models (LLMs), and optimizing data strategies. Explored AWS tools like Amazon Bedrock, SageMaker, and Amazon Q for AI development and deployment. Gained insights on leveraging AI to drive efficiency, enhance productivity, and improve business decision-making.

Joomla Web Program , *Alexander Abe Instructor*

Angular, React & Node Guide , *Filip Jerga Instructor*

Data Center Application Development Basics ,
ACLC Antipolo City

Speak English Like A PRO , *ACLC Antipolo City*

EDUCATION

Polytechnic University of the Philippines, Manila
Bachelor of Science in Industrial Engineering

Semester 2010 - 2011

Colegio de San Juan de Letran, Manila PH
Bachelor of Science Information Technology - Digital Arts

Semester 2011- 2012

AMA Computer Learning Center ,Antipolo City PH
Computer System and Design Program

Degree Completed 2013- 2015

CERTIFICATES

- AWS Artificial Intelligence Practitioner Learning Plan
- AWS Foundations: Machine Learning Basics
- AWS Cloud Practitioner Essentials
- Customizing and Evaluating LLMs Using Amazon SageMaker Jumpstart
- Developing Machine Learning Solutions
- Developing Generative Artificial Intelligence Solutions
- Essentials of Prompt Engineering
- Exploring Artificial Intelligence Use Cases and Applications
- Foundations of Prompt Engineering
- Introduction to Amazon EC2 Auto Scaling
- Optimizing Foundation Models
- Planning a Machine Learning Project
- Responsible Artificial Intelligence Practices
- Security, Compliance, and Governance for AI Solutions

SCHOOL AWARDS

- Top 5 Programmer and Dean Lister
- Top 2 System Analysis and Design
- TOP 4 Work Ethics and Standard
